The tip sheet that lets you in on Wall Street's dirty little secret!

Here's how to hone in on the still perfectly legal "secret" strategy used by some of Wall Street's most conniving, most manipulative (and most successful) super-rich traders, so you too can rake in huge, over-night profits like these:

Inya Ivkovic, M.A.
Editor, Pump and
Dump Alert

87% profit in just 22 days on Teleplus Enterprises.
74% profit in only 15 days on Conspiracy Enterprises.
71% profit in a mere 21 days on ActionView International.
63% profit in 14 days on Crown Medical Systems.

WHERE DID ALL THE BIG-PROFIT IPOs GO?

Now Companies Go Public with This *Little-known* Backdoor Process That

Makes Investors Like You up to 3,000% Profit!

Imagine buying a tiny \$0.03 stock that trades as high as \$50 six weeks later! A \$1,000 investment would be worth over \$1,600,000!

.....

Wall Street is dead wrong (again) about our favorite wireless stock:

- We first recommended this wireless stock in March 1999, at a trading price of \$3.84, when Wall Street wouldn't go near it. We sold it in March 2000 at \$74.00 for a **one-year gain of 1,827%!**
- After the tech selloff we defied the talking heads and re-bought the stock in September 2002 at \$4.35. This time it took until June 2004 to reach \$72.07 for **another gain of 1,557%!**
- That's an **accumulated gain of 3,384%** on this killer stock since March 1999!
- At that rate **an investment of \$5,000 would have exploded in value to \$169,200!**
- Now Wall Street's calling it a burned-out shooting star, and the market has kicked the heck out of its trading price in the past few days. But the talking heads are wrong again. As Wall Street dumps it, **we're buying more and banking on another 1,557% gain** in the months ahead. Read on to discover why this wireless stock has enormous upside left.
