

VISTA

Vista Users

If you have any issue loading or running with vista, here is the resolution.

Click Start
Select- Control Panel
Select- User Accounts
Select- Turn User Accounts on or off
Uncheck- Use User Account Control (UAC)
Click- OK

Please be sure to save any open work as settings changes may require a restart of your computer.

Note: This software requires you to have an autoresponder account which you really should have if you wish to build a list and make a full time living online. If you do not have one yet, click here to get an TrafficWave account to try for 30 days free.

Action Tool Instructions:

Step 1: Open the Application.

Step 2: "General" Column:

- 1) Page to insert the script - Enter the location of the file that you like to use. You can use the "browse" button to search for the file that you want to use.
- 2) Max Number of Sales - You will use this if you want to show how many sales you like to put and after the sales meet the quota, the offer expires and redirect them to a page. The default value is 0.
- 3) Sales Counter Refresh - You will use this if you want to refresh your page depending on the value that you enter in minutes.

Step 3: Choose a type of expiration that you want to use in the "Offer Type" Column.

- 1) Only limit number of sales - The page will expire once the total number meet the sales quota that you enter in the "Max Number of Sales".
Important Reminder: You need to insert a token variable " %%copiesleft%% " in the template page that you are using if you use this option.
- 2) With Expiry Date - Choose the date that you want to expire the page.
- 3) One Time Offer - The page will expire depending on the value that you enter in minutes.
Important Reminder: You need to insert a token variable " %%timeleft%% " in the template page that you are using if you use this option.

Step 4: You can add a Motivator Bar in your page.

Reminder: Motivator Bar is optional. If you don't want to put motivational bar, skip this step.

If you want to add a Motivator bar follow this steps:

- 1) Motivator Bar Text - You can add a text here. You must insert a token variable " %%timeleft%% ".(e.g. This offer will expire in %%timeleft%%)
- 2) Show Motivator Bar - Choose if you like to show your motivator bar at the top of the page or bottom of the page.
- 3) Motivator bar Color - Choose a background color of the motivator bar.
- 4) Bar width - Enter a value of the width of the bar.
- 5) Bar Height - Enter a value of the height of the bar.
- 6) Bar Border - Enter a value for the motivator bar to have a border.

Step 5: Enter a URL to redirect the page once expired in the "Next Page" column.

Step 6: Click "Generate Script" button.

Step 7: Open the "phpenabler.php" file which is generated by the software. Check the script \$htmlfile = "salesletter.html". Check if the filename that you use where you insert the script is the same in the "phpenabler.php" file.

Step 8: Upload the generated scripts to your server using an ftp software.

Once you upload the generated scripts, You can check it in your browser. For example
(<http://www.yourdomain.com/phpenabler.php>)

Have fun,
