

# Google Plus (+)

Instant Upload

## In this section you will learn:

- How to Enable or Disable the Instant Upload feature for your mobile phone
- How to manage your uploaded photos and videos

## What is Instant Upload?

- Instant Upload is an application for your Android mobile device
- It allows you to automatically sync photos and videos taken with your device to your Google Plus account

## Compatibility

- Instant Upload is not compatible with all Android devices
- The device must be operating Android 2.2 or higher to use Instant Upload

## Installing Instant Upload

- To install Instant Upload, you must first have Google Plus Mobile on your Android device
- Go to the mobile website to get started

 [www.google.com/mobile/+/](http://www.google.com/mobile/+/)

## Installing Instant Upload

- You can also visit the mobile site in your device's web browser

**Want Google+ for mobile?**

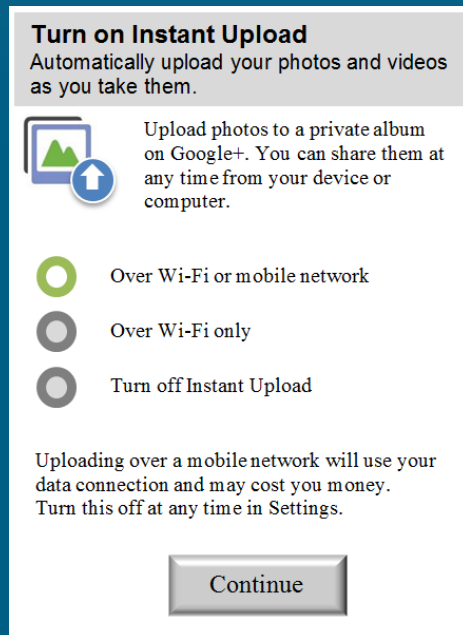

Visit this URL in your phone's browser:

**[m.google.com/plus](https://m.google.com/plus)**

# Enabling Instant Upload

- When you use Google Plus Mobile for the first time, you will be prompted to either enable or disable the Instant Upload module of Plus Mobile

## Changing Instant Upload Settings

- While your Google Plus Mobile Application is open, go to the settings menu
- From here, you can enable or disable the Instant Upload feature

### Instant Upload settings

#### Instant Upload

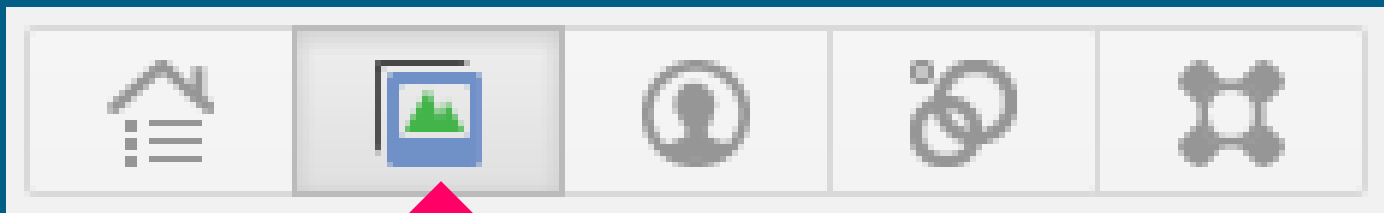

Automatically upload new photos & videos to a private web album

## Managing Your Uploaded Content

- Visit your Google Plus account from a computer, not your phone
- View your photo albums and click on the From your phone album

## Managing Your Uploaded Content

- 
- Click on the From your phone album to view your Instant Upload content
